

Effective Intervention for Literacy and Language

Accelerate progress toward grade-level skill proficiency in grades preK–6

With a personalized approach to instruction, Imagine Language & Literacy® promotes student growth in critical reading and language skills in three key ways:

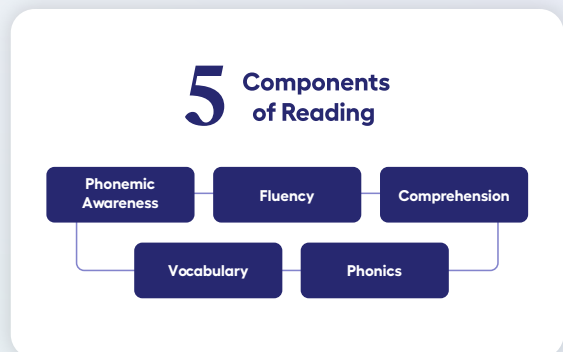

1 Always adapting

Imagine Learning’s **Smart Sequencer™** continuously monitors and dynamically adjusts each student’s learning path to ensure every minute spent in the program increases learning outcomes.

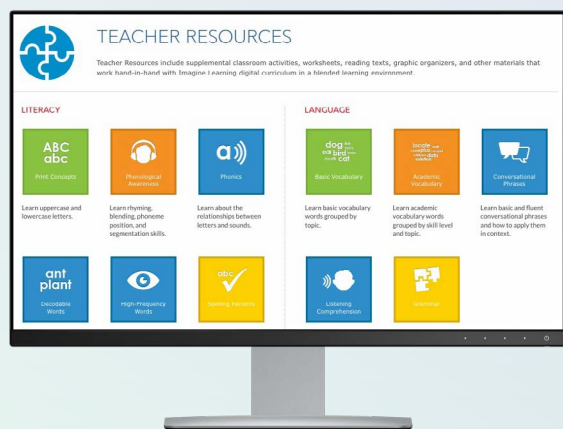

2 Evidence-based approach

Explicit, systematic instruction and practice in all five components of reading — phonological awareness, phonics, fluency, vocabulary, and comprehension — accelerates reading proficiency for striving readers and maximizes language gains for emerging bilingual students regardless of their English proficiency level.

3 Easy next steps for educators

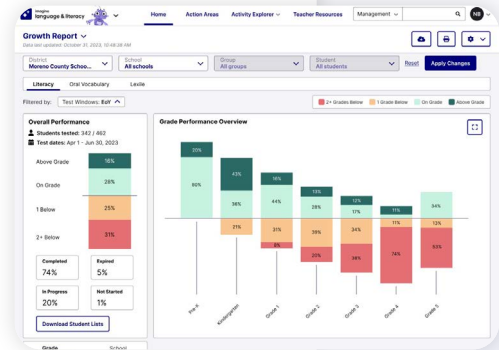

Teachers can create custom playlists of activities — from segmenting phonemes to citing text evidence — based on flagged instructional needs or print recommended resources for small groups and tutoring.

One solution, two options for intervention

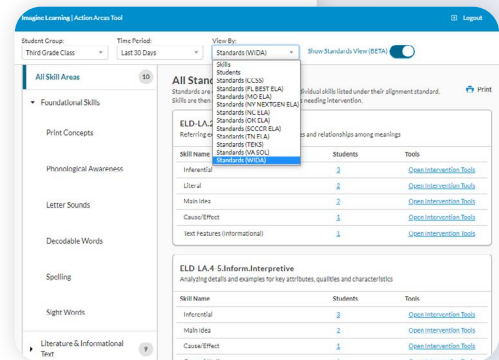

For all students

For All Students/Tier 1	
Identify Opportunities for Additional Learning	Demonstrated by the embedded placement assessment, NWEA MAP Growth, or Galileo ELA assessment
Take Action	By scheduling student session time — the Smart Sequencer handles the rest
Monitor Impact	With included reports, such as the growth report

When students need more support

As Needed/Tiers 2 & 3	
Identify Opportunities for Additional Learning	Demonstrated automatically by skill, standard, and student in the Action Areas Tool
Take Action	By using the Intervention Tool to assign a customized playlist of recommended resources with the click of a button
Monitor Impact	With the My Playlist Report

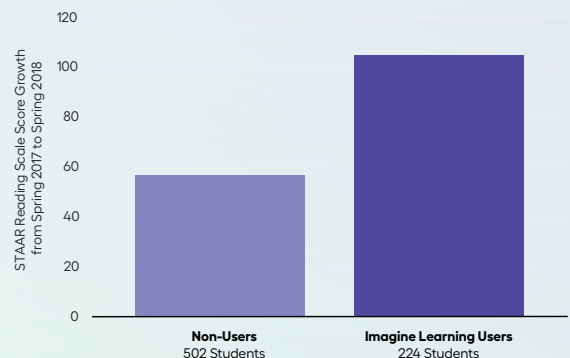

Imagine incredible outcomes!

Give students personalized learning, college and career readiness, and English language support that activates their engagement and builds confidence.
