

Advanced Security for Uncompromised Learning

Robust, innovative protections to safeguard your district's data

At Imagine Learning, we don't stop at compliance. We prioritize the security and reliability of your district's IT infrastructure, always innovating to ensure that your systems are safeguarded with advanced technologies that scale to meet your needs.

- **In-Depth Technical Specifications:** Our security framework is built on current technologies to ensure your district's data is always secure, including:
 - Strong data encryption in transit and at rest (i.e., TLS, AES-256)
 - Firewalls built to protect against DDoS and other threats
 - Best-in-class employee account protection
- **Proactive Threat Mitigation:** Continuous monitoring and real-time alerting paired with a rigorous incident response plan ensures quick, effective action in the event of any security threat.
- **Scalability and Reliability:** Imagine Learning's infrastructure is designed to scale effortlessly across your district without compromising on security or performance, offering you peace of mind as your needs grow.
- **Security Audit Process:** Regular, comprehensive security audits, external assessments, and ISO 27001 certification ensure that our systems remain secure and compliant, continuously improving and adapting to stay ahead of emerging threats.
