

Spanish Language Arts Benchmark Assessments

What is the purpose of the Spanish Language Arts Benchmark Assessments?

The Imagine Galileo® K–12 SLA Benchmarks assess students’ grade-level Spanish literacy and language arts skills up to three times per year. These benchmark assessments were trans-adapted from the K–12 Galileo English Language Arts benchmarks. Aligned to the national college and career standards for Spanish Language Arts, these fixed-form assessments are designed to be administered online and are intended to measure a student’s grade-level Spanish literacy and language arts skills. The SLA benchmarks are ideal for use in biliteracy and dual language classrooms.

What do the Spanish Language Arts Benchmark Assessments measure?

The Imagine Galileo K–12 SLA Benchmarks follow an intentional blueprint, ensuring skills and standards are measured at similar rigor and difficulty levels across all three assessments. This purposeful design allows educators to monitor students’ mastery of grade-level Spanish literacy and language arts skills while also analyzing student growth and achievement over time.

- Assessment blueprints available
- Measurement of standards mastery overtime
- Developmental Level (DL) scores*
- Suite of reporting including Standards Mastery, Growth, & Achievement

SLA Benchmarks At-A-Glance:

- Grades K–12
- Online Administration
- Multiple choice with a variety of technology-enhanced item types
- Approximately 35 questions
- Administration time varies — typically 1 hour

Imagine Galileo K–12 SLA Benchmarks High-Level Blueprint
